

TREAT OF THE DAY

CLIFTON JURA

PROJECT OVERVIEW

Cognisant of the massive amounts of food that Africa imports from Europe each and every year, my company Treat Of The Day (www.macadamia.us) currently has Tree Nut farming and food processing concerns in Kenya and Tanzania.

We also recently gained 2,000 acres in Lindi, Tanzania that we are keen on developing into a commercial bio-char and JADAM resource for our green houses, grain farming and organic vegetables. The land is vast so we'll be deploying drone-based smart farming.

Lindi also has virgin beaches for resorts and would make for a great college town.

I also personally own quite a bit of riverfront land(River Nzoia) near Ambira, Kenya as well as 2 acres of Lake Front land in Kisumu Kenya. Goal is expanding Cage Fish Farming on the lake with the aim of ultimately putting up a fish processing factory on site (mainly for fillet export to EU and US).
